

VEHICLE MAINTENANCE TECHNICIAN I & II

Program Description: Learn to diagnose, adjust and repair automotive vehicles. The program includes a community classroom component at the end of training. Curriculum & materials are included. Students learn both in the classroom and in an industry, setting performing the duties of an automotive technician. Students will learn and be responsible for diagnosing and repairing vehicle engine systems including the following:

- Repair brake and steering systems
- Diagnose and repair electrical and electronic systems
- Replace or repair transmissions and fuel components as needed
- Repair cooling components and systems including air conditioners and engine cooling
- Perform emissions inspections, safety checks and similar state-regulated vehicle examinations
- Maintain a clean, safe working environment
- Produce legible and accurate paperwork reflecting work performed

Length: 98 hrs. Plus Required Community Classroom
